

RAHUL R GADGIMATA

AI/ML Engineer | GenAI | Computer Vision | Full-Stack Development | Open to Internships
+91 7019670142 | rahulrgadgimata@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Davanagere, Karnataka, India

PROFILE SUMMARY

AI/ML and Full-Stack Engineer with hands-on experience in Generative AI, Computer Vision, and end-to-end web development. Built and deployed an oral cancer screening platform with a multilingual voice assistant, an AI-based vulnerability scanner with automated threat detection, and a sports-league event management platform serving 740+ users. Currently Co-Founder & CTO at an ed-tech startup, leading technology strategy and AI/ML integration.

EDUCATION

GM University, Davanagere, Karnataka

2023 – 2027 (Pursuing)

Bachelor of Technology (B.Tech) – Computer Science & Engineering (AI & ML) | Cumulative CGPA: 9.1/10

TECHNICAL SKILLS

Languages: Python, C, C++

AI/ML: Machine Learning, Deep Learning, Computer Vision, Data Mining, LLMs, Agricultural Technology

Web & Frameworks: React.js, Next.js, Node.js, Flask, FastAPI, ASP.NET Web API, Socket.IO, HTML5/CSS, Bootstrap

APIs, DB & Cloud: REST APIs, JWT, SQL, Redis, SQLite, SQLAlchemy, Relational Databases, SaaS, Virtual Machines

DevOps & Security: Docker, GitHub Actions (CI/CD), Prometheus, PySpark, Nmap, Wireshark, Kali Linux

Soft Skills & Languages: Leadership, Team Management, Communication, Problem-Solving, Adaptability | Kannada, English, Hindi

PROJECTS

CodeVEN AI – AI-Based Vulnerability Scanner

Mar 2026 – Present

- Built an AI-powered vulnerability scanner with web crawling, JS analysis, and Nmap port scanning to detect SSL issues, missing security headers (CSP, HSTS), and open ports with AI-based threat severity classification.
- Implemented DDoS risk assessment using FastAPI, httpx, Redis, SQLite, and PySpark; containerized with Docker, automated CI/CD via GitHub Actions, and integrated Prometheus for API and system monitoring.

SecureGPT – AI Security & Threat Intelligence Platform

Aug 2025

- Enterprise RAG assistant using LangChain, FAISS, and LLMs for citation-based Q&A over PDF and DOCX files.
- Built semantic search with vector embeddings; FastAPI backend deployed via Docker and GitHub Actions CI/CD.

Oral Cancer Detection System

Tech Stack: HTML5, CSS3, JavaScript, API, CNN (ResNet), Flask (Python)

- Trained a CNN (ResNet) model on 1,000+ images with strong screening accuracy and built a full-stack application where patients take a screening test using both images and habitual risk factors.
- Integrated a multilingual, voice-based virtual doctor avatar ("Dr. Aria"), enabling simple voice-based screening and patient-doctor interaction.

GM League – EMS (Event Management System)

Aug 2025 – Present

Tech Stack: Python, Flask, SQLAlchemy, HTML5, CSS3, JavaScript

- Developed and deployed a web platform to streamline player and team-owner registrations and manage the bidding process efficiently for a college sports league; hosted on a college-allotted virtual machine.
- Scaled the platform to handle 700+ player sign-ups and 40+ team owners.

CERTIFICATIONS

Advanced Deep Learning & AI Systems (Udemy) | Neo4j Graph Data Science Certification (Neo4j) | Neo4j & Generative AI Fundamentals (Neo4j)

ACHIEVEMENTS

- Elected as **General Secretary, Student Affairs** at GM University (Jan 2023 – Present), leading Student Affairs and organizing national-level events, including **Ignitron**.
- Co-founded **Stack Education**, leading technology strategy and product development as Co-Founder & CTO.
- Won 1st place in 3 hackathons** — **Srishti** (National-Level, 36-Hour Hackathon), **Emerge 2025** (State-Level Hackathon), and the **GM University Hackathon**.
- Placed **2nd** in a National-Level 24-Hour Hackathon (Hyderabad) and **2nd Runner-Up** in a National-Level 30-Hour Hackathon (Mumbai).
- Mentored 250+ students** through technical workshops, hackathons, and AI/ML learning initiatives.
- Served as **Judge for 5+ hackathons**, evaluating innovative projects across AI and emerging technologies.
